### ABOUT ME:

I consider myself a creative, responsible, flexible, and persistent individual. I possess strong analytical skills, critical thinking, and excel in finding effective solutions to potential challenges. While I am a self-learner and independent, I also enjoy collaborating and working within a team.

### EDUCATION

Bachelor's Degree in Cybersecurity Engineering I  
URJC (Móstoles) 2020 - Present

Currently pursuing my 4th year of the program.

High School Diploma I Colegio Virgen de Europa  
(Boadilla) 2018 - 2020

Achieved a GPA of 9.6/10 with two honorable mentions (in ICT and Philosophy). Completed the EVAU in 2020, achieving a score 13.00/14.

### SKILLS

#### Full Stack Development

Passionate about web development with skills in both front-end and back-end. Continuously learning to create responsive web pages, with a primary focus on Django and SQL databases.

#### Programming

Strong in Python. Experienced in C, Java, and JavaScript. Competent in low-level programming using MIPS assembly language, and Bash scripting by developing projects such as a Linux minishell.

#### Design

Self-Taught design skills including photo editing with Photoshop, document design with Canva and InDesign, and web design with Figma.

#### Algorithms and IA

Proficient in fundamental algorithms, including greedy algorithms, graph traversal, divide and conquer techniques, and backtracking. Additionally, I possess basic knowledge in AI, covering heuristics, learning types, and data handling.

#### Project Management

Familiar with agile methodologies including Scrum, XP, and Kanban, and proficient in tools like Jira and Miro.

#### CTFs

Participated in some CTFs gaining some experience in steganography, web hacking, static and dynamic malware analysis, and utilizing tools like Radare2, Cutter, Selenium, Wireshark, CyberChef, Binwalk, and Nmap.
